

OneIndia Analytics Report

Statistics, operational trends, financial performance, endpoint health, and Power BI visualization guidance based on CSV datasets in the analytics folder.

Executive Snapshot

ACTIVE USERS

3,950

328 new registrations on latest day

PLATFORM REVENUE

Rs. 23,539.5

4141% growth from day 1

API UPTIME

99.6%

465 failed requests out of 1,24,320

TRANSACTION SUCCESS

97.5%

4,050 latest-day P2P transfers

Growth signal:

Active users reached 3,950 and retention improved to 87%.

Operational risk:

/api/kyc/upload is the slowest endpoint at 245 ms average response time.

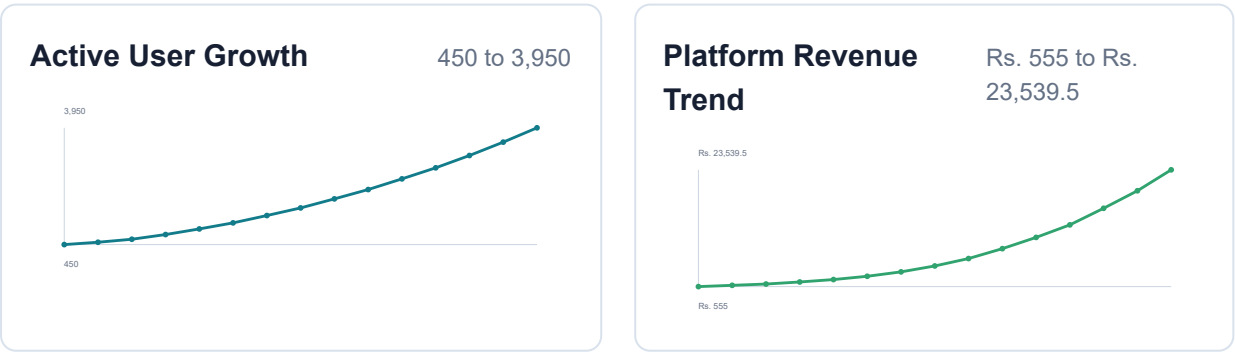

Traffic concentration:

/api/health has the highest tracked API traffic with 52,000 requests.

KYC gap:

KYC completion is 16.6% of active users, making onboarding completion a key product metric.

Statistical Graphs

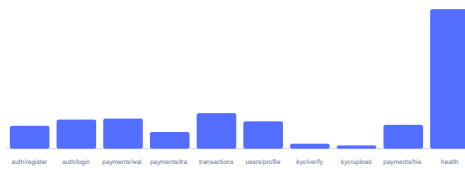

Endpoint Response Time

Highest: 245 ms

**Endpoint Request Volume**

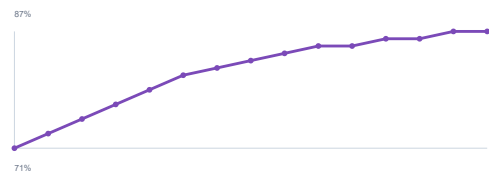

Highest: 52,000

**Average Transaction Value**

Rs. 75.5 to Rs. 193.7

**Retention Rate**

71% to 87%

**Q1 Projection Progress**

January baseline against Q1 targets

Daily Active Users

3,950 current / 15,000 target

**Platform Revenue INR**

23,539.5 current / 2,50,000 target

**API Uptime %**

99.6 current / 100 target

**Average Response Time ms**

131 current / 100 target

Endpoint Performance Table

Endpoint	Total Requests	Avg Response	P95 Response	Uptime
/api/auth/register	8,520	148 ms	185 ms	99.2%
/api/auth/login	10,850	130 ms	165 ms	99.7%
/api/payments/wallet	11,230	97 ms	125 ms	99.7%
/api/payments/transfer	6,200	159 ms	215 ms	98.6%
/api/transactions	13,250	89 ms	115 ms	99.9%
/api/users/profile	10,200	104 ms	140 ms	99.8%
/api/kyc/verify	1,850	198 ms	260 ms	97.8%
/api/kyc/upload	1,220	245 ms	350 ms	96.7%
/api/payments/history	8,900	112 ms	145 ms	99.7%
/api/health	52,000	45 ms	60 ms	100%

Power BI Visualization Plan

1. Import data

Use Get Data > Text/CSV and import all five CSV files from the analytics folder.

2. Build measures

Create success rate, KYC completion rate, revenue per transaction, and performance category measures.

3. Create pages

Use pages for Executive Overview, Technical Performance, Business Metrics, and Q1 Projections.

4. Add slicers

Add date, endpoint, status, and performance category slicers for interactive exploration.

5. Apply thresholds

Use conditional formatting for response time above 200 ms, uptime below 99%, and error rate above 2%.

6. Publish

Publish to Power BI Service, schedule daily refresh, and pin KPI cards to a stakeholder dashboard.

Recommended Power BI Visuals

Dashboard Area	Visual	Fields	Purpose
Executive	KPI cards	ACTIVE_USERS, TOTAL_REVENUE_INR, UPTIME_PERCENT	Show business health at a glance.
Growth	Line chart	DATE, ACTIVE_USERS, RETURNING_USERS	Track adoption and retention movement.
Revenue	Combo chart	DATE, TOTAL_VOLUME_INR, SUCCESSFUL_TRANSACTIONS	Compare volume growth with reliability.
Technical	Bar chart	ENDPOINT, AVERAGE_RESPONSE_TIME_MS	Rank slow endpoints for optimization.
Reliability	Matrix	ENDPOINT, UPTIME_PERCENT, P95_RESPONSE_TIME_MS	Spot SLA risk quickly.
Forecast	Progress bars	JANUARY_DATA, MARCH_PROJECTION, Q1_TARGET	Monitor Q1 target progress.

Generated from OneIndia analytics CSV files. Latest source date: 2024-01-15. Average sampled API response: 127 ms. Average cache hit rate: 83%.
